### *Nature's Rhythm*

Forms and shapes, abstract and minimalist, symbols of freedom, elation, and the perpetual journey. Hand-molded ceramics in white and blue color, rhythmic forms that playfully move with intimacy and tension against light and shadows that morph into new formations.

Ceramic forms, invoking the movement of the waves, flocks of birds flying overhead, schools of fish sweeping in synchrony through deep blue sea. Sculptures inspired by the fins, tails and feathers, formed by the clay, a material used since ancient times in our homeland that bridges our history and tradition with the modern present.

Merged with other materials, glass and metal, each sculpture travels in perpetual movement representative of our quest constant for freedom and harmony.

**With every baby, a hope is born. We want to keep that hope alive!**

The Miracle Babies Association's founding vision is the expansion and upgrading of the neonatal intensive care unit (ICU) at the Archbishop Makarios III Hospital to European Standards of healthcare based on international guidelines.

Our goals are:

- Offer healthcare services to premature babies that ensure the best possible start to life.
- Provide facilities that allow parents to have a continuous presence in the neonatal ICU.
- Ensure appropriate staffing of the neonatal ICU in accordance with international standards.

The Association aims to support and strengthen the existing neonatal ICU, and to continually raise public awareness and understanding on issues related to premature births and sensitize the public to these.

On the occasion of this art exhibition, we would like to thank the artist Varvara Georgiou, Alpha C.K. Art Gallery for hosting this event, the communication sponsor "Kathimerini" newspaper, our ongoing supporter DeLeMa McCANN Cyprus, and the public for their continuous support and encouragement.

Elena Megalemou Triantafyllides
